SUMMARY

Data Scientist and AI Consultant with a background in UX Research. I help companies understand their customers and make strategic decisions using data science and machine learning. Available as a freelance contractor (registered in Italy), fluent in Italian, English and Spanish.

WORK EXPERIENCE

Data Scientist & AI Consultant

Freelance & Subcontractor for Wonder & Wonder

Remote

Aug 2026 - Present

- **Conjoint modelling (client: OSB Group):** designed and analysed conjoint analysis studies supporting a brand restructuring project; built scenario simulators to evaluate alternative product configurations and inform strategic branding decisions.
- **MaxDiff analysis (client: Wikipedia):** ran advanced MaxDiff analyses to identify the key drivers of donation propensity, translating the results into strategic guidance for optimising fundraising messaging and improving conversion rates.

Data Scientist

Wonder & Wonder Insights and Strategy

Remote

Feb 2025 - Aug 2026

- **Large-scale social listening (clients: Coca-Cola, Pernod Ricard):** built an end-to-end web scraping and social listening pipeline, applying topic modelling, sentiment analysis, NER, trend detection and graph-based network analysis to large volumes of social data; the insights shaped brand strategy and audience positioning.
- **Predictive forecasting (client: Wikipedia):** developed time-series forecasting models of readership, with seasonal decomposition and calendar features, to predict demand and detect shifts in reader interest over time; the outputs were adopted by Wikipedia's analytics team.
- **Segmentation (client: McLaren):** developed K-Means clustering models and feature engineering on large-scale survey data, translating behavioural patterns into targetable segments for marketing campaigns.
- **Internal AI copilot:** built an AI copilot over research data with RAG retrieval, user-defined segmentation filters, retrieval quality evaluation and guardrails on model responses: analysts query the data in natural language and generate insights by segment, replacing manual extraction with self-serve access.

Freelancer UX Consultant

Upwork

Remote

Nov 2023 - Jun 2024

- A/B tested landing pages and redesigned a Shopify store, cutting bounce rate by 30%; behavioural analysis with Google Analytics event tracking to pinpoint drop-off points.

UX Researcher

Eargym LTD

Remote

Apr 2022 - Jun 2023

- A/B tested game features, delivering measurable improvements in user experience and engagement.

Associate UX Researcher

University of Nottingham

Hybrid

Oct 2021 - May 2022

- Co-author of a peer-reviewed paper published at ACM CHI, cited 14 times to date.

EDUCATION

Georgia Institute of Technology

MSc Computer Science, AI specialisation (part-time, online)

2026 - Present

University of Nottingham

MSc Human-Computer Interaction (Final grade: Distinction)

Sept 2020 - Sept 2021

University of Nottingham

BSc (Hons) Neuroscience (Final grade: 2.1)

Sept 2017 - Jun 2020

SKILLS

Data Science & Machine Learning: Python (Pandas, NumPy, Scikit-learn, XGBoost) · SQL · Predictive Modelling · Forecasting · Clustering (K-Means) · Conjoint Analysis · MaxDiff · Feature Engineering · Statistical Analysis

AI & NLP: Claude Code · LLMs · RAG Architectures · Prompt Engineering · LangChain · Hugging Face · NLP (Topic Modelling, Sentiment Analysis) · Process Automation

Data Engineering & Cloud: AWS (S3) · Docker · Git · FastAPI

Analytics: Google Analytics · A/B Testing · Marketing Analytics · Segmentation
